

## JOB VACANCY – JOIN OUR FRIENDLY & ENERGETIC TEAM

### Reactive Maintenance Technician

Premier Forecourts and Construction provide a range of specialist construction services for fuel forecourt projects, electric vehicle (EV) charging installations, public sector, retail and commercial projects. Our extensive experience on varied construction projects means we can provide unique services, including project management, installation, maintenance, servicing, refurbishment, rebranding, design planning and surfacing works. Our clients include some of the most recognised blue-chip companies in the UK.

---

#### What we'll be asking you to do...

As a Reactive Maintenance Technician, you will be responsible for delivering prompt, effective responses to a wide range of forecourt and building maintenance issues throughout the UK. You will respond to reactive maintenance requests within agreed timescales, covering a variety of tasks, including, but not limited to, building fabric repairs, carpentry, fencing, window/door installation, and shuttering with a strong bias for plumbing repairs, such as fixing or replacing taps, sinks, pipework, toilets and associated fittings.

#### What we would like from you...

- Practice and promote high standards in Health & Safety and Accident Prevention
- Carry out assigned maintenance work (planned and reactive)
- Good IT Skills and understanding
- Complete Surveys using in-house software
- Attend emergency call-outs within the required SLA
- Communicate directly with clients and attend planned site meetings

- Supervision of specialist sub-contractors
- Be responsible for a company vehicle, site equipment, materials and off-hiring plant as required
- Be flexible in your approach to your role and tasks, leading by example
- Seasonal on-call Rota (Christmas and New Year)
- Be mindful of business costs and unnecessary waste with a proactive attitude to planning tasks
- The ability to work as a lone worker and as part of a team when required
- Honesty and Integrity in your role
- Support the business in delivering its Vision, Mission, and Premier Values

### **Desired Skills & Qualifications**

- Previous experience in planned and reactive maintenance
- Skill sets within multiple trade disciplines
- Good numeracy and literacy skills
- Good communication skills
- Well organised and good time management
- A good problem solver
- Holder of a full UK driving licence
- SSTS or SMSTS
- UK PIA (Fuel Industry Safety Passport) - Training Course can be provided

### **What you can expect from us...**

- A full-time permanent contract with a minimum of 40 hours per week
- 20 days holiday plus bank holidays, plus an additional two days on completing two years' service
- Salary Sacrifice Auto Enrollment Pension Scheme
- Health Care Cash Plan\*\*
- Employee Assistance Programme\*\*
- Retail Discounts\*\*
- Death in Service Insurance\*\*
- Health and Wellbeing Initiatives
- Employee Referral Scheme
- Industry Training and required certification
- All uniform and Personal Protective Equipment (PPE) provided
- All accommodation paid for in advance
- Tax-free meal allowances in line with HMRC guidelines

---

\*\* Terms and Conditions apply

**Recruitment Agency Support is not required for this role at this time.**
